

Re: Landry Spitler / Red Mountain High School, Mesa AZ / 2022

My name is Jeff Pentland. I've been a hitting coach for over 45 years, the last 17 of those years were in the major leagues. I have been working with Landry Spitler for the last 3 years, starting year 2017, which was one year before becoming a freshman at Red Mountain High School.

I believe Landry will be an above average college hitter with well above average power. His hitting progression has been on point, with well above average improvement in all phases of hitting. He has improved, every year, in pitch recognition as well as strike zone discipline.

Landry's greatest asset as a hitter is his easy power to all fields, especially his opposite field power. He also hits for average with well above average plate discipline at his stage of his baseball career. Landry's approach as a hitter is through the center of the diamond with the ability to hit the ball where it is pitched.

Landry works very hard on developing his hitting skills by consistently working tirelessly at practice on the field as well as in the batting tunnel. He works religiously on the hitting drills I have given him and mastered those drills quickly. His sequencing is outstanding with excellent eye hand coordination. He is very athletic with a burning desire to be the best hitter possible.

Landry is an outstanding person with great respect for his family and his teachers. He also has leadership qualities with outstanding goals for life as well as his baseball career. He is a can't miss at any university as an outstanding player and student. These are tough times for all, especially for young people who trying to show their capabilities as student athletes. It's extremely difficult when the player can't compete on the playing field.

Trust me Landry Spitler is the real deal both on and off the field.

Please contact me if I can help in anyway. Thank you.

Jeff Pentland
